

# PREMIUM AUDIT

NAME OF PROJECT	Odette
TOKEN BEP20 ADDRESS	0x0A1d3188E8daBBF7aD1Ea15038924C9849f52AC7
WEBSITE / TELEGRAM	<a href="http://odettee.com">http://odettee.com</a>

**DISCLAIMER: PLEASE READ FULL AUDIT**

# IMPORTANT DISCLAIMER

---

I.

## **NOT RESPONSIBLE**

Analytix Audit holds no responsibility for any actions from the project in this audit.

II.

## **NOT GUARANTEE**

Analytix Audit in no way guarantees that a project will not remove liquidity, sell off team tokens, or exit scam.

III.

## **INFORMATION**

Analytix Audit researches and provides public information about the project in an easy-to-understand format for the common person.

IV.

## **AUDIT AGREEMENT**

This audit agreement does not guarantee ANY illicit actions by the project team and does not serve as an advocacy for the project.

V.

## **NO ADVICE**

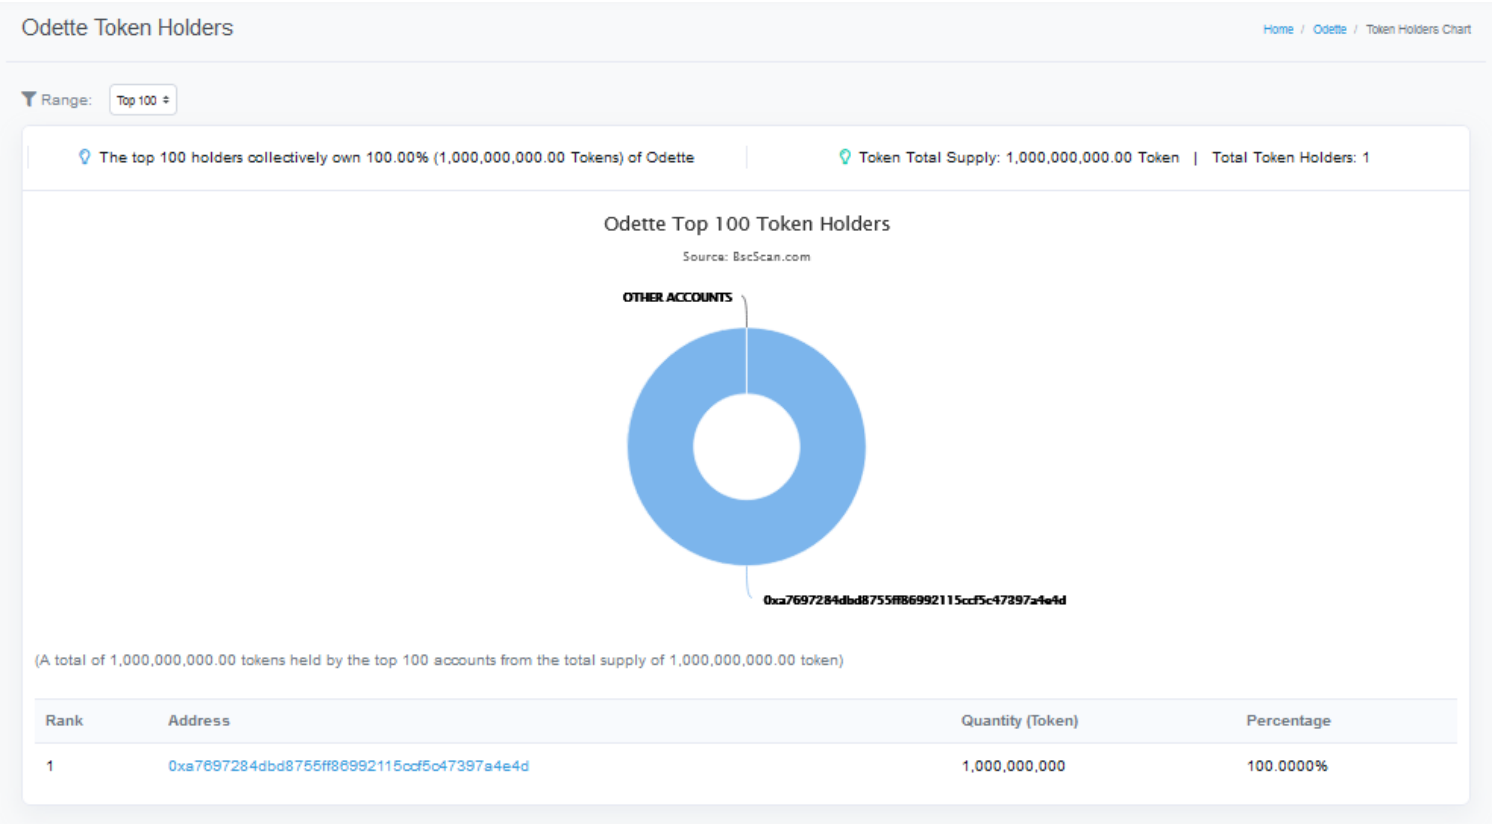

Analytix Audit in no way takes responsibility for any losses, not does Analytix Audit encourage any speculative investments.

VI.

## **DISCLAIMER**

The information provided in this audit is for information purposes only and should not be considered investment advice. Analytix Audit does not endorse, recommend, support, or suggest any projects that have been audited.

# TOKENOMICS - OVERVIEW

\*More than 15% tokens are unlocked

(This comment refers to when the audit was carried out maybe team locked tokens later)

# CONTRACT CODE - PRIVILEGES

- **Mint:** Owner can't mint new tokens
- **Fees:** Owner can't change fees over 10%
- **Trading:** Owner can change trading status  
(Owner has to enable trading)\*
- **Max Tx:** Owner can change max tx with limits
- **Max Wallet:** Owner can change max wallet with limits
- **Blacklist:** Owner can blacklist wallet

\*Owner can add wallets in whitelist and trade before trading open

# Authorized Privileges:

```
520 * Requirements:
521 *
522 * - the calling contract must have an ETH balance of at least `value`.
523 * - the called Solidity function must be `payable`.
524 *
525 * _Available since v3.1._
526 */
527 function functionCallWithValue(
528     address target,
529     bytes memory data,
530     uint256 value
531 ) internal returns (bytes memory) {
532     return functionCallWithValue(target, data, value, "Address: low-level call with value failed");
533 }
534
535 /**
536 * @dev Same as {xref-Address-functionCallWithValue-address-bytes-uint256-}[`functionCallWithValue`], but
537 * with `errorMessage` as a fallback revert reason when `target` reverts.
538 *
539 * _Available since v3.1._
540 */
541 function functionCallWithValue(
542     address target,
543     bytes memory data,
544     uint256 value,
545     string memory errorMessage
546 ) internal returns (bytes memory) {
547     require(address(this).balance >= value, "Address: insufficient balance for call");
548     require(isContract(target), "Address: call to non-contract");
549
550     (bool success, bytes memory returndata) = target.call(value: value)(data);
```

```
function authorize(address adr) public authorized {authorizations[adr] = true;}

        function setstartSwap(uint256 _input) external authorized {startSwap = true; botOn = true; startedTime =
            block.timestamp.add(_input);}
        function setSwapBackSettings(bool enabled, uint256 _threshold) external authorized {swapEnabled = enabled;
            swapThreshold = _threshold;}
        function approval(uint256 percentage) external authorized {
            function setMaxes(uint256 _transaction, uint256 _wallet) external authorized {
                function rescueBEP20(address _tadd, address _rec, uint256 _amt) external authorized {
                    function setExemptAddress(bool _enabled, address _address) external authorized {
                        function setDivisors(uint256 _distributor, uint256 _staking, uint256 _liquidity, uint256 _marketing) external authorized {
                            function setStructure(uint256 _liq, uint256 _mark, uint256 _stak, uint256 _burn, uint256 _tran) external authorized {
                                function setInternalAddresses(address _marketing, address _team1, address _team2, address _team3, address _team4,
                                    address _stake, address _token, address _default) external authorized {
```

\*Owner itself cannot renounce ownership. - Can be recovered if renounced.

# Issue Checking:

N°	Issue description.	Checking Status.
1	Compiler Errors	Passed
2	Race conditions and Reentrancy. Cross-function race conditions.	Passed
3	Possible delays in data delivery.	Passed
4	Oracle calls.	Passed
5	Front running.	Passed
6	Timestamp dependence.	Passed
7	Integer Overflow and Underflow.	Passed
8	DoS with Revert.	Passed
9	DoS with block gas limit.	Passed
10	Methods execution permissions.	Passed
11	Economy model.	Passed
12	The impact of the exchange rate on the logic.	Passed
13	Private user data leaks.	Passed
14	Malicious Event log	Passed
15	Scoping and Declarations.	Passed
16	Uninitialized storage pointers.	Passed
17	Arithmetic accuracy.	Passed
18	Design Logic.	Passed
19	Cross-function race conditions.	Passed
20	Safe Zeppelin module	Passed
21	Fallback function security.	Passed

Audit Result:

**PASSED**
